

Announcement

Science in School Issue 18 Now Available

8 April 2011

The latest issue of *Science in School*(<http://www.scienceinschool.org/>), the European journal for science teachers, is now available online and in print. Issue 18 marks five years since *Science in School* was launched in March 2006. The journal promotes inspiring science teaching by encouraging communication between teachers, scientists and everyone else involved in European science education, and every issue is jam-packed with informative articles.

This issue features cutting-edge science news, teaching activities, science education projects, events, and much more besides. ESO contributions in this issue include news about the first super-Earth atmosphere being analysed by astronomers using ESO telescopes, and an account of a student winning an ESO prize in the European Union Contest for Young Scientists, which took him on the trip of a lifetime to the Very Large Telescope on Cerro Paranal in Chile.

Science in School is published by EIROforum(<http://www.eiroforum.org/>), a collaboration between eight European intergovernmental scientific research organisations, of which ESO is a member. The journal addresses science teaching both across Europe and across disciplines: highlighting the best in teaching and cutting-edge research.
