In brief

ESA Education's [e-technology lab](#) is a specialist teacher training facility dedicated to supporting Primary- and Secondary-level teachers in science, technology, and ICT curricula. Workshops were stopped in March 2020 due to COVID-19 restrictions, but are now scheduled to restart in October 2022!

In-depth

— teachers attending an e-technology lab workshop

help inspire students. Separate workshops will be available to suit Primary or Secondary teachers, with one of each expected to be scheduled monthly.

Located at [ESEC](#) in Belgium, the e-technology lab has a proven track record of empowering teachers, boosting their confidence, and equipping them with skills and knowledge to

ESA Education workshops are designed to follow inquiry-based learning methodologies, in order to promote active learning in the classroom,
